We highlight our outstanding students in each issue.

Making a Difference

Katie Cox works toward a more environmentally just world. She has been coordinating residents of Santa Ana neighborhoods as they assist in air quality sampling in order to show the health effects that local pollution has on their communities and the entire region. Her dedication to solutions for these issues is matched by her work in undergraduate education at UCI.

Latest Research

Barbara Finlayson-Pitts has studied air quality issues from most every angle. Pine trees, tailpipe emissions, fog, sea salt, even seal excrement have all been topics of her investigations. Now she's expanding her research into the area of agriculture, specifically the use of neonicotinoid pesticides, and has opened a whole new can of worms.

Spotlight on Faculty

Eric Saltzman criss-crosses the globe to further our understanding of the effects of climate change on our atmosphere and oceans. His work on ice cores and the air/sea flux are legendary, exploring both current and ancient levels of oceanic and atmospheric trace gases and showing increases in human activity that generate these emissions.
