Making a Difference

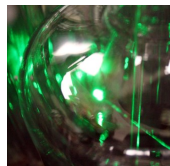

On August 23rd, 2023, AirUCI presented a Legislators Day event to which we invited every elected official representing Orange County from federal, state, county, and City of Irvine offices. 25 representatives from the U.S. Senate, U.S. Congress, California State Senate, California State Assembly, Orange County Supervisors, and the City of Irvine enthusiastically attended.

Latest Research

Rufus Edwards studies the effects of emissions on populations exposed to combustion byproducts from transportation, wildfires, tobacco smoke, and other sources in the industrialized world as well as rural areas. His recent studies on pollution from open fire cooking and rudimentary stoves has measured and quantified emissions generated by such cooking methods.

Spotlight on Faculty

Jane Baldwin's work focuses on atmosphere and ocean dynamics, extreme weather event risk, climate modeling and impacts, environmental health, and catastrophe modeling so she is a natural resource for interviewers that seek expert opinion on climate issues. This year she's been frequently asked to comment on heat/humidity/health connections.
